

Daymonex Ltd.

We act for the wind-up administrator of the underfunded Daymonex Pension Plan in the receivership proceedings of Daymonex. We brought a bankruptcy application to the court to render Daymonex bankrupt and “reverse the priorities” to obtain a recovery ahead of another creditor who claimed a priority payment. The court granted the application. We thereby obtained an enhanced recovery to the pension plan, which helped to reduce the losses to the pension plan members.
